

## **WEEK 11: ANIMAL TRIVIA**

### **Using the Right Word, Comma (Series), Capitalization, Numbers, Colon, Apostrophe (Possessives), Interjection**

Of all known forms of animal life to live on the Earth, only about 10% still exist today. Here are some unusual facts about the biggest and smallest of the animals on the earth today. The hummingbird is the only bird that can hover and fly in 4 directions up down forward or backward. In captivity, pigeons live up to fifteen years and sometimes longer. Elephants kill more than 500 people a year worldwide. Wow I guess not every elephant is as friendly as Dumbo. Also, a cat's tail has 20 different bones. Finally, fleas have changed history. More human deaths have been attributed to fleas than all the wars ever fought. As carriers of the Bubonic Plague, fleas were responsible for killing one third of Europe's population in the 14th century.
